

SacValley CNPS Demonstration Gardens

EACH GARDEN IS AN OPPORTUNITY TO SHOWCASE, SHARE AND EDUCATE!

ROBIN'S FRONT YARD

This garden was adopted by Robin Rietz, the Nursery's Propagation Director. As we encourage the community to shift to native plants, it is likely that for many, the idea of letting native plants grow wildly and naturally won't be their first choice. Robin's Front Yard is just one way we to represent the beauty and potential for uniformity with natives by carefully selecting suitable plants in combination with some maintenance.

If you are looking to elevate your front yard with a charming combination of native plants, then Robin's Front Yard is the landscape design for you. This zone provides a florid landscape with sufficient pollinating plants for essential pollinators in your region, while also being well-kept and easy on the eyes. Having a native yard that is left to evolve on its own and break down naturally, will always provide the most for wildlife, but even a yard that has been trimmed and maintained can provide numerous benefits to you and essential critters. This native yard will thrive with less water, without pesticides or fertilizers, improve soil health and structure, along with providing food, homes, and materials for wildlife. Let us help you create a manicured, yet progressive landscape design with our native plants to help brighten and refresh your day!

| | |
|--------------------------------------|-------------------------------------|
| Foothill Sedge | <i>Carex tumulicola</i> |
| Western Redbud | <i>Cercis occidentalis</i> |
| California Fuchsia | <i>Epilobium canum</i> |
| Fleabane Daisy | <i>Erigeron foliosus</i> |
| California Buckwheat | <i>Eriogonum fasciculatum</i> |
| Woolly Sunflower | <i>Eriophyllum lanatum</i> |
| California poppy | <i>Eschscholzia californica</i> |
| Frying Pans | <i>Eschscholzia lobbii</i> |
| Canyon Dudleya | <i>Dudleya cymosa</i> |
| Crevice Alumroot | <i>Heuchera micrantha</i> |
| Hollyleaf Redberry | <i>Rhamnus ilicifolia</i> |
| Blue Elderberry | <i>Sambucus nigra ssp. Caerulea</i> |
| Pacific stonecrop | <i>Sedum divergens</i> |
| Vinegar Weed | <i>Trichostema lanceolatum</i> |
